

Environmental Excellence

- We offer the option to offset all our carbon waste on deliveries to Customers.
- Allpack is aiming for PAS2060/Carbon Neutral Accreditation by 2024.
- Over 80% of the plastic we sell is more than 30% recycled.

Platform Growth

- We aim to fund and operate renewable power production at scale.
- As a result of the above, we aim to alter social awareness in pursuit of a genuine low-carbon future.
- We aim to work with clients and partners to build scale and embed sustainable thinking as part of a shared philosophy.
- We aim to deliver sustainable profitable growth while satisfying our ethical, legal and contractual obligations.

Operational Excellence

- We aim to prevent pollution, minimise waste and encourage the efficient use of natural resources throughout all our business operations.
- We aim to improve our energy efficiency and reduce our carbon footprint across all our operations, adopting best practices where possible to support continued improvements in our environmental performance.
- We aim to nurture and enhance biodiversity as part of our business operations and activities.
- We aim to consider the environmental impacts of our supply chain, and where possible, purchase goods that have a minimal impact on the environment.
- We aim to assess and work with key suppliers that uphold the highest levels of environmental performance to ensure compliance with environmental standards.

People

- We aim to create an exciting and inspiring workplace for all employees, providing opportunities to develop their skill sets and contribute to the growth of the business.
- We aim to provide an inclusive workplace where all employees feel valued and respected.
- We aim to improve the environmental awareness of all our employees as part of their personal and professional development, through sustainability-related training and events.
